Agenda

Schedule for a AI Visionaries Summit

2026

8:00am - 9:00am

Registration and Welcome Coffee Networking
Meet and mingle with attendees

9:00am - 9:10am

Opening Remarks by Magnivel International

9:10am - 09:50am

Panel Discussion
Accelerating the future of AI and supercomputing

This panel explores how advances in supercomputing, AI chips, and large-scale infrastructure are enabling next-generation AI capabilities. Speakers will discuss global compute race dynamics, public-private investments, and the role of high-performance computing in accelerating innovation. Key Takeaways: The future of AI compute and supercomputing ecosystems Strategic investments shaping global AI leadership Implications for governments and enterprises.

Key Takeaways:

- The future of AI compute and supercomputing ecosystems
- Strategic investments shaping global AI leadership
- Implications for governments and enterprises

09:50am - 10:30am

Panel Discussion
Redefining AI: From Enterprise Threat to Strategic Asset

Once seen as a risk, AI is now becoming a core driver of enterprise value. This session examines how organizations are overcoming fear, governance challenges, and skill gaps to embed AI into core business strategy.

Key Takeaways:

- Turning AI risk into competitive advantage
- Governance and leadership alignment
- Real-world enterprise transformation stories

**10:30am - 11:00am****Panel Discussion****When to Invest, Pause, or Pull the Plug?**

This panel addresses one of the most critical leadership challenges: deciding when AI initiatives deserve further investment — or should be stopped.

Key Takeaways:

- Go/no-go decision frameworks
- Risk management strategies
- Learning from AI project failures

**11:00am - 11:30am****Panel Discussion****Using AI to transform drug discovery and development**

Artificial intelligence is reshaping the way new medicines are discovered, developed, and delivered. This panel will explore how AI is accelerating research, improving decision-making across the drug development lifecycle, and enabling more efficient, data-driven innovation while addressing challenges around validation, regulation, and adoption.

Key Takeaways:

- Leveraging AI for target identification, molecule design, and lead optimisation to reduce time and cost.
- Using AI to improve clinical trial design, patient recruitment, predictive analytics, and real-world evidence generation.
- Addressing data quality, regulatory considerations, ethical AI, and cross-industry collaboration to scale AI-driven innovation.

**11:30am - 12:00pm****Mid-Morning Coffee & Networking****Curated networking with fellow delegates, speakers, and sponsors.****12:00pm - 12:30pm****Panel Discussion****The Principles and Practices Behind Becoming an AI-First Organization**

This panel breaks down what it truly means to be “AI-first,” beyond pilots and experimentation. Speakers will share frameworks, cultural shifts, and operating models that enable sustained AI adoption.

Key Takeaways:

- AI-first operating models
- Change management and talent strategies
- Metrics that measure AI maturity

**12:30pm - 13:00pm****Panel Discussion****Do the Benefits of AI Justify the Investment?**

As AI budgets grow, leaders must justify ROI. This panel addresses cost structures, investment prioritization, and financial models that support sustainable AI deployment.

Key Takeaways:

- Measuring AI ROI and business impact
- Managing costs and expectations
- Investment decision frameworks

**13:00pm - 14:00pm****Networking Lunch****An informal setting for relationship-building and sponsor engagement.****14:00pm - 14:30pm****Panel Discussion****How can AI deliver maximum value to patients?**

As AI becomes more deeply integrated into healthcare, its true measure of success lies in improving patient outcomes and experiences. This panel will explore how AI can enable more personalised, accessible, and equitable care while ensuring trust, transparency, and responsible implementation.

Key Takeaways:

- Leveraging AI to support precision medicine, early diagnosis, and individualised treatment plans.
- Using AI to expand access to care, enhance patient engagement, and improve health outcomes across diverse populations.
- Balancing innovation with privacy, ethics, transparency, and regulatory compliance to build patient trust and long-term value.

**14:30pm - 15:00pm****Panel Discussion****Edge-Based Agents Delivering Measurable Autonomous Value**

This session focuses on autonomous AI agents operating at the edge — where speed, privacy, and real-time decision-making matter most.

Key Takeaways:

- Use cases for edge-based AI agents
- Measuring autonomous system value
- Infrastructure and deployment challenges

**15:00pm - 15:30pm****Panel Discussion****What If Green AI Is in the Red?**

A critical discussion on sustainability, energy consumption, and the real cost of “green” AI initiatives.

Key Takeaways:

- The Environmental cost of AI
- Balancing Innovation and Sustainability
- Driving Sustainable AI Adoption

**15:30pm - 16:00pm****Panel Discussion****When machines decide– control, risk and accountability**

As AI systems take on greater decision-making responsibilities, questions of governance, transparency, and human oversight become increasingly critical. This panel will examine how organizations can balance AI autonomy with accountability, manage emerging risks, and build trust in high-stakes applications.

Key Takeaways:

- Defining the right balance between automated decision-making and meaningful human control
- Addressing issues such as bias, explainability, security, and reliability across AI-driven systems.
- Establishing clear frameworks for responsibility, regulatory compliance, and ethical AI deployment to ensure confidence in machine-led decisions.

**16:00pm - 16:30pm****Afternoon coffee break****Curated networking with fellow delegates, speakers, and sponsors.****16:30pm - 16:45pm****Speaker Presentation Slot****16:45pm - 17:00pm****Speaker Presentation Slot****17:00pm****Closing ceremony of AI Visionaries Summit 2026****Key reflections, acknowledgments, and the roadmap ahead.**

Sponsorship Opportunities Available

- Title, Platinum, Gold, and Silver Sponsorships
- Panel and Fireside Chat Sponsorships
- Exhibition & Demonstration Booths
